# 2600+

The new Tally Dascom 2600+ is the **further developed variant** of the successful Tally Dascom 2600.

Thanks to the two-part upper cover, the printed pages can now be removed even more easily from the end of the book. A **metal tear bar** ensures that even thicker paper or multiple sets are separated cleanly. The **durable ribbon for 10 million characters** can easily be replaced. The new ribbon mask ensures that the ribbon is inserted correctly. In addition to the standard interfaces **USB, Parallel and Ethernet** (with IPv6 support), the Tally Dascom 2600+ now also has a **USB host interface**, so that new firmware can easily be installed with the help of a USB stick.

The new print head is not only **up to 20% faster**, but also allows for a **noise reduction of up to 2 decibels** thanks to its design.
